

SMRT Green Code of Conduct

Every SMRT employee is responsible for protecting the environment for the long term, in the areas of:

Energy Management
Air Management
Waste Management
Water Management
Green Resources

SMRT employees must consider the environmental impact of their work and address them in business decision-making. Employees and business partners must demonstrate a commitment to comply with environmental legislation, regulations as well as the SMRT Environment Policy.

Employees and business partners must also adhere to the following underlying principles

- Protect the environment at their worksites
- Show leadership and commitment towards assessing and managing environmental impact
- Minimise and mitigate damage to the environment
- Conserve natural resources
