

SMRT Trains Ltd – Assistant Engineer, Rolling Stock Workshop

You will lead, control and supervise a team of Technical Officers in the maintenance, repair, overhaul, testing and troubleshooting of train borne mechanical and electrical equipment having high voltage of 750V DC traction and low voltage of 110V DC control systems. You are required to troubleshoot and diagnose faulty equipment to determine root cause of equipment failure, take remedial action and make reliability improvements. You will also undertake technical support, system improvement and modification works as well as administrative assignments.

Requirements:

You should have a Diploma in Electrical, Mechanical, Mechatronics or Building Services Technology with experience in maintenance, repairing, overhauling and troubleshooting of mechanical and electrical equipment. You should possess good oral and written communication skills as well as the ability to work independently in a team. Good supervisory skill, decisionmaking and the ability to organise and plan for the work would be preferred.
