

### **SMRT Trains Ltd – Engineer, Power & Services (Project & Technology)**

You will assist in designing of electrical services for commercial developments and additions and alteration works in MRT Stations, bus interchange station and depots. Specific tasks include:

- (a) Design of Low Voltage main and sub-main distribution system in compliance with local Code of Practice (e.g. CP5, CP33), Regulation and Authority requirements
- (b) Co-ordination with Commercial and relevant parties including the Contractor/LEW for specific design or performance criteria
- (c) Preparation of electrical design drawings and single line diagrams including modifications to existing Low Voltage system and interface design requirements
- (d) Review and approval shop and as-built drawings submissions
- (e) Participate in factory inspection, testing and commissioning works and power turn on activities

#### **Requirements:**

You should possess a Technical Diploma in Electrical Engineering with 8 to 10 years of relevant building services design experience. Past experience in electrical and mechanical consultancy and site supervision works and knowledge of computer aided design application tools like auto-cad, will be preferred.
