

SMRT Trains Ltd – Executive Engineer/ Engineer, Integrated Supervisory Control System

You will be part of the team involved in the maintenance of the Integrated Supervisory Control System (ISCS) for Circle Line. You will lead a team of assistant engineers and technicians in the preventive and corrective maintenance of ISCS to achieve high reliability and availability of the system in accordance with the standard set by the Authority.

Your role will require you to be involved in the planning and scheduling of preventive maintenance, reviewing and certifying of work instructions, collection and analysis of fault statistics and ensuring all safety plans are implemented. You will also be involved in the audit of works to ensure all works are carried out in accordance to ISO quality standards and managing the purchase of spares, equipment and tools.

Requirements:

You should possess a Degree in Electrical/ Electronics Engineering or a Diploma with at least 8 years of working experience in ISCS or SCS environment. Candidates who have knowledge of Sun Solaris 9, Oracle 9i Database and Cisco IOS will be an added advantage. Candidate should also possess strong analytical and problem-solving skills, communication skills and exhibit strong leadership capabilities.
